Ollie Mallard

Solutions Architect at Addigy
Milton Keynes, England, United Kingdom

Experience

Addigy
Solutions Architect
August 2026 - Present (1 month)

Samsara
Sales Engineer
October 2025 - August 2026 (11 months)

Jamf
Sales Engineer - UK&I
April 2022 - August 2025 (3 years 5 months)

Acting as a trusted advisor on the full Jamf platform, with deep expertise in both Apple device management and enterprise grade security.

Supporting customers throughout complex deployments, proof of concepts, and long-term planning.

Specialising in Jamf Pro, helping organisations manage Apple devices at scale with:

- Zero-touch deployment via Apple Business/School Manager and Automated Device Enrolment (ADE)
- Custom configuration profiles, app lifecycle management, and policy enforcement
- Integration with identity providers (Azure AD, Okta) and network tools for a unified management approach
- Scalable architecture planning and best practices for large fleets (upwards of tens of thousands of devices)

- Partner with customers to optimise their environments by aligning technical solutions with business objectives, compliance mandates, and end-user experience goals.

Support adoption and integration of Jamf's security solutions, including:

- Jamf Protect – real time threat prevention and endpoint telemetry for macOS
- Jamf Security Cloud – phishing prevention, content filtering, secure DNS, and mobile threat defence for iOS, macOS, Windows and Android devices
- Jamf Connect ZTNA – enabling modern Zero Trust Network Access (ZTNA) for secure, conditional resource access without the need for legacy VPN technology

Contribute to partner enablement efforts, delivering technical training and content to ensure partners are equipped to position and implement Jamf's management and security offerings.

Proactively assist customers in applying ever-evolving best practices and strategies, helping to future proof their device management operations and reduce technical debt across large scale deployments.

SHI International Corp.

Apple Presales Systems Engineer

March 2019 - April 2022 (3 years 2 months)

Milton Keynes, United Kingdom

Worked as an Apple Pre-Sales Systems Engineer, assisting both customers and sales teams with building out strong Apple solutions and experiences. This includes both Apple's own ecosystem as well as products and management platforms that ensure that using Apple in business is a first class experience for both the end user and those managing it.

Jamf 200 certified and always looking to expand my knowledge further.

Apple

6 years 5 months

Technology and Merchandising Pro

September 2018 - March 2019 (7 months)

Responsible for all in store technology and merchandising. I was responsible for ensuring that the store met visual standards both front and back of house, including keeping device content up to date, fixing visual elements where required and organising and leading visual resets during new product launches or when visual changes were required.

I was also responsible for the managing and maintenance of various in store use equipment such as payment devices, Macs, printers and any other technology required for day to day operations.

IS&T Retail Programs - Hardware Engineer March 2018 - September 2018 (7 months)

Worked as a Hardware Engineer within IS&T Retail Programs, responsible for hardware across Apple Stores in EMEA including payment devices, printers and Macs. During this time I would ensure that stores had functional and well maintained mission critical devices, working closely across departments and vendors to resolve issues before they became widespread. Ensured that turn around time for hardware specific tickets was kept low and that replacement equipment was delivered to stores in a timely manner in order to avoid any business disruption.

Also had exposure and some training in Jamf MDM software for a very large number of Macs and iOS devices that were rolled out across the business.

Genius October 2016 - March 2018 (1 year 6 months)

- Providing world class customer support and repair services.
- Fully qualified to undertake iOS and Mac repairs with ACiT and ACMT certifications.
- Provide a high end customer service experience, providing both software support and hardware repairs for a range of Apple products and systems including iPhones, iPads and both portable and desktop Macs.
- Provide customers with clear and meaningful service options including options to upgrade to newer devices and empowering the customer to choose their service path.
- Support the wider technical team with mentoring, training and assistance when possible.

Expert July 2014 - October 2016 (2 years 4 months)

- Consistently achieving top quartile sales results within store and market

- Provide training and mentoring of current and new members of the team on new initiatives, strategies and services
- Working alongside store leadership, market leaders and global teams to implement new strategies
- Maintain a deep technical understanding of Apple products
- Monitor and help maintain a high level of customer satisfaction
- Demonstrating and developing key Lominger competencies including drive for results, action oriented, peer to peer relations among others.

Business Specialist

June 2013 - October 2016 (3 years 5 months)

- Create, develop and maintain professional relationships between Apple and business customers.
- Work with clients to build tailored solutions for their business in both small and large purchases.
- Provide quotes and pricing to customers for both small and large volume purchases.
- Support sales floor in introducing more customers to the business team.

Support Leader

October 2015 - March 2016 (6 months)

As part of an in store career experience, I aided leadership on a day to day basis with the overall running, organization and customer flow of a busy store with large footfall during peak holiday times.

- Organize and rezone team members on the sales floor throughout the day to maintain a smooth operation
- Provided support for team members with process and product related queries.
- Organizing the Genius Bar team, ensuring appointments are kept on time, customers were remaining happy and creating availability for more appointments to increase productivity.
- Ensure the wider team is happy, motivated and stress free to create a positive work environment.
- Taking customer escalations and concerns, taking the time to find a solution to a customer enquiry or resolving an issue that has caused upset.

Specialist

March 2013 - July 2014 (1 year 5 months)

- Create customers and new owners of all ages with the best customer experience possible.
- Adapt to and operate in a very busy and ever changing environment.

- Mentor and aid in the training and development of both new and existing colleagues in the workplace.
- Help new and existing customers to expand their skills and knowledge of our products through training workshops and classes.

Back of House Specialist

November 2012 - March 2013 (5 months)

- Stock and Inventory management
- Help to ensure that store supplies were always replenished
- Assisting with Visual Merchandising
- Delivery products to customers in a timely and friendly manner

Education
