

KESSOG CHAN

London | kesschan.kc@gmail.com | +44 07552 959 429 | Full UK Working Rights | [LinkedIn](#)

Presales professional at Huawei. Runs demo and discovery sessions with Enterprise Customers. 5 years of experience in stakeholder management and requirements discovery across B2B tech solutions and banking system development. MSc Business Analytics, BNO visa, no sponsorship required now and the future.

WORK EXPERIENCE

Huawei Consumer Business Group

London, United Kingdom

Portfolio Solution Presales

Apr 2026 – Present

- Turned customer input into documented solution scope for a Tier-1 UK mobile network operator pursuit by covering the full requirements cycle across 3 technical workshops and a structured analysis session with the customer's engineering stakeholders.
- De-risked what a Tier-1 UK operator pursuit could commit to by validating solution feasibility across 6 of the account's subnets before proposal, as dedicated presales cover inside a 5-person pursuit team.
- Cut USD 2 of cost out of every unit for a Tier-1 UK mobile network operator by making the case across GTM roadmap and pricing reviews that a low-value feature carried no weight in the customer's buying decision.
- Cut about an hour a week of sign-off paperwork and removed a daily manual check across every live sample by building VBA automation and a scheduled task into that programme.

Bank of China (Hong Kong)

Hong Kong

Technical Product Manager, E-Banking Product

Aug 2023 – Oct 2024

- Delivered 100 percent of the HKMA's regulatory mandates inside a hard 14-day window by translating the regulation into an implementation plan and coordinating internal teams and third-party vendors to ship Geo-IP fraud detection with impossible-travel logic.
- Recovered 8 hours a week of manual reporting effort across 20 systems, about 400 hours a year, by deploying a centralised Grafana observability framework in place of hand-assembled weekly reports.
- Closed a 3-year backlog in e-banking incident triage by specifying and validating a Python anomaly-detection prototype, built with a developer, that separated critical incidents from deployment noise across 50,000+ historical logs.
- Standardised requirements intake with a 7-question elicitation framework covering objective, context, stakeholders, success criteria, scope, constraints and evidence sources, closing gaps through follow-up interviews before anything reached JIRA.
- Aligned third-party vendors and internal teams on a single integration path by running technical workshops that folded external fraud solutions into the bank's internal detection framework.

Apple

Hong Kong

Operation Data Analyst

Mar 2021 – Aug 2023

- Reversed a headquarters decision by presenting evidence that store operations varied by location, moving the Shanghai development team off centralised training and onto store-specific delivery.
- Won reporting-pipeline adoption from all 6 flagship store leaders by demoing it myself, walking each through their own use cases and daily upkeep before handing over ownership.
- Eliminated roughly 1,500 manual hours a year across 6 flagship stores by replacing a 5-hour-per-store weekly data entry routine with a self-maintaining reporting setup, moving regional directors from lagging reports onto current labour data.

Apple

Hong Kong

B2B Solution Expert

Jan 2020 – Mar 2021

- Generated GBP 350,000 in new B2B pipeline across a 50+ account portfolio by running discovery, solution positioning and qualification end to end, then escalating matured accounts to the corporate sales team to close.
- Closed a GBP 50,000 deal with Hong Kong broadcaster Viu TV over 3 months, turning a walk-in store visit into a qualified opportunity, building credibility through hands-on technical support and a custom business pricing portal, then clearing their device-management objection by upselling MDM.

EDUCATION

University of Exeter

Exeter, United Kingdom

Master of Business Analytics

Oct. 2024 – Dec. 2025

- **Merit**
- **Relevant Coursework:** AI Governance & Predictive Risk Engine. Cut high-risk incorrect approvals (False Positives) by 24 cases per 100 previous instances through an optimised machine learning model auditing algorithmic decision-making.

Hang Seng University Hong Kong

Hong Kong

Bachelor of Communication Technology

Aug. 2018 – Sep. 2022

ADDITIONAL INFORMATION

- **Languages:** English (fluent, professional), Cantonese (native), Mandarin (native)
- **Skills:** Sales Framework, Presales discovery and requirements intake · solution feasibility validation · value engineering and commercial case-building · cross-functional stakeholder coordination (GTM, vendors, evaluation teams) · objection handling · RFI/RFP response support · Python (pandas, data analysis), VBA, Grafana, JIRA, R
