Presales and technical product professional working as the customer-facing bridge between engineering, product and sales across enterprise tech and telecom. Currently covers requirements discovery, IoT solution feasibility and pricing input on a Tier-1 UK mobile network operator account at Huawei. MSc Business Analytics, University of Exeter. No sponsorship required.

WORK EXPERIENCE

Huawei Consumer Business Group

London, United Kingdom

Portfolio Solution Presales

Apr 2026 – Present

- Turned customer input into documented solution scope for a Tier-1 UK mobile network operator by covering the full requirements cycle across 3 technical workshops and a structured analysis session with the account's engineering stakeholders.
- Got hardware in front of the customer's evaluation teams ahead of decision points by owning the demo unit programme for a Tier-1 UK mobile network operator, tracking 60 to 80 live evaluation devices against launch deadlines, clearing cross-border transfers and holding sign-off throughout.
- Cleared the technical path for the pursuit team's proposal by validating solution feasibility across 6 account subnets before commitment, as dedicated presales cover inside a 5-person cross-functional pursuit team.
- Cut USD 2 per unit in product cost for a Tier-1 UK mobile network operator by making the case across GTM roadmap and pricing reviews that a low-value feature carried no weight in the customer's buying decision.

Bank of China (Hong Kong)

Hong Kong

Technical Product Manager, E-Banking Product

Aug 2023 – Oct 2024

- Delivered 100 percent of the HKMA's regulatory mandates inside a hard 14-day window by translating the regulation into an implementation plan and coordinating internal teams and third-party vendors to ship Geo-IP fraud detection with impossible-travel logic.
- Recovered 8 hours a week of manual reporting effort, about 400 hours a year, across 20 systems by deploying a centralised Grafana observability framework in place of hand-assembled weekly reports.
- Closed requirements gaps before anything reached JIRA by standardising intake with a 7-question elicitation framework covering objective, context, stakeholders, success criteria, scope, constraints and evidence sources, backed by follow-up interviews.

Apple

Hong Kong

Operation Data Analyst

Mar 2021 – Aug 2023

- Won reporting-tool adoption from all 6 flagship store leaders by demoing it myself, walking each through their own use cases and daily upkeep before handing over ownership.
- Reversed a headquarters decision on store training strategy by presenting evidence that store operations varied by location, moving Apple's Shanghai development team off centralised training onto store-specific delivery.
- Eliminated roughly 1,500 manual hours a year across 6 flagship stores by replacing a 5-hour-per-store weekly data entry routine with a self-maintaining reporting setup, moving regional directors from lagging reports onto current labour data.

Apple

Hong Kong

B2B Solution Expert

Jan 2020 – Mar 2021

- Generated GBP 350,000 in new B2B pipeline across a 50+ account portfolio by running discovery, solution positioning and qualification end to end, then escalating matured accounts to the corporate sales team to close.
- Closed a GBP 50,000 deal with Hong Kong broadcaster Viu TV over 3 months by turning a walk-in store visit into a qualified opportunity, building credibility through hands-on technical support and a custom business pricing portal, then clearing their device-management objection by upselling MDM.
- Onboarded 12 portfolio accounts onto custom stores with post-sales service coverage.

EDUCATION

University of Exeter

Exeter, United Kingdom

Master of Science, Data Analytics

Oct. 2024 – Dec. 2025

- **Merit**
- **Relevant Coursework:** AI Governance & Predictive Risk Engine. Cut high-risk incorrect approvals (False Positives) by 24 cases per 100 previous instances through an optimised machine learning model auditing algorithmic decision-making.

Hang Seng University Hong Kong

Hong Kong

Bachelor of Computer Science

Aug. 2018 – Sep. 2022

ADDITIONAL INFORMATION

- **Languages:** English (fluent, professional), Cantonese (native), Mandarin (native)
- **Skills:** Presales discovery and requirements elicitation, technical demonstrations and workshops, solution feasibility validation, RFI/RFP support, value engineering and pricing input, cross-functional stakeholder coordination, Python (pandas, data analysis), VBA automation, Grafana, JIRA
- **Interests:** Connected hardware and IoT, systems design, sustainable transport
