Hi Kessog,

Thanks for showing interest in joining Cognia, we're building something genuinely exciting and we'd love to hear more about you.

As a first step, I'd love to jump on a 30-minute intro call. Grab a time that works for you here: [👉 self-schedule link](#)

One quick heads up on note-taking: We use [Metaview](#) — an AI note-taker — on our calls. It means we can stay fully present in the conversation rather than furiously scribbling notes, and it helps us give you a fairer, more consistent experience. If you'd prefer not to be recorded, no problem at all — just [opt out here](#) and it'll apply to all future Cognia calls too.

Can't see a slot that works? Just reply and we'll sort something out.

Really looking forward to speaking with you.

Megan Kemp

Hi Megan,

Thanks for reaching out! I've just booked a slot for Monday.

Really looking forward to the chat. Is there anything specific I should prepare and is it mostly focused on an initial run-through of my background?

Either way, speak on Monday!

Best regards,

Kessog

Hey Kessog,

Thank you so much for taking the time to chat with me last week, and for being so generous with your examples from Huawei and Bank of China - it was great to learn more about your background.

After reviewing your interview with the team, we've decided not to move forward with your application for the Solutions Analyst role on this occasion. This is a really competitive process and it doesn't reflect on the strength of your

experience.

We'd love to keep you in mind for future opportunities at Cognia that might be a closer fit, and please don't hesitate to apply again down the line.

Thanks again for your time and interest in Cognia, and I wish you all the best with your search.

Best,

Meg

Hi Meg,

Thank you for letting me know, and for the kind words regarding my background. While I'm disappointed not to move forward for the Solutions Analyst role, I genuinely enjoyed our conversation and learning more about Cognia.

As I continually refine my approach for future opportunities, I would be very grateful for any brief feedback or suggestions the team might have on where I could improve.

Also, if you still have a quick moment, could you please forward over the transcript from our screening call that you mentioned previously? It would be super helpful for my own review and self-reflection.

I will definitely keep an eye out for future openings at Cognia and would love to stay in touch. Wishing you and the team all the best.

Best regards,

Kessog Chan

Hi Kessog,

Of course, happy to share some thoughts - and thank you again for such a thoughtful conversation, it was clear how much care you put into your examples.

The main gap for us was around the shape of your experience. Your examples were really strong on discovery and scoping - understanding the underlying problem, aligning stakeholders, building the right-sized solution - but they stopped short of full implementation with an external client. This role is quite specifically about owning that relationship all the way through to delivery, so we were looking for a clearer example of that end-to-end ownership with a customer, rather than internal stakeholders or a handover once the scope is agreed.

None of this is a reflection on your ability - your strategic thinking came through really clearly - just where the balance of this particular role didn't quite line up with your background.

Please see attached transcript.

Thanks again, and I'll definitely keep you in mind for future roles that might be a better fit.

Best,

Meg
