Experience

CKH Innovations Opportunities Development
Senior Global Vendor Consultant
February 2022 - Present (4 years 6 months)

CKH Innovations Opportunities Development (IOD) is the international development hub of CK Hutchison (CKH), creating international and global

technological innovations that are built on one of CKH's strongest assets, mobile networks. Accountable for the end-to-end global partnerships of key strategic vendors, across multiple categories. Categories include smartphone, tablets, IoT, SIM/eSIM and fixed wireless access hardware, including app partnerships.

Key Responsibilities:

- Identify new vendor opportunities, negotiate commercial terms and legal contracts on-behalf of 7 countries
- Define and promote fixed mobile wireless strategy with leading brands and launch into the group a central procurement function which delivers best in class commercials and product offering
- Maintain and accelerate the growth of the existing revenue lines working with our global partners
- Promote and continuously develop the CKH Group's IOT devices and hardware portfolio
- Ensure CKH Group's hardware portfolio capabilities and roadmaps remain competitive and highly disruptive
- Work with partners, go-to market and OpCos, to implement best practice
- Engage with new emerging vendors, product management and central procurement process
- Manage supplier relationships and ensure roadmap requirements are timely adapted and delivered, building robust business plans
- Negotiate commercial deals with key industry partners across all key categories
- Influence a wide variety of stakeholders through leadership and commercial acumen

Virgin Media O2

Head of Devices & Supply

June 2021 - December 2021 (7 months)

Accountable for end-to-end device portfolio strategy and commercial management. Overall responsibility for all in-life, central planning and execution functions. P&L owner of Virgin Mobile hardware margin & partner funding

Key Responsibilities:

- P&L owner of handset margin

- Portfolio ranging strategy that is built on market and consumer needs; with objective of offering a credible range that drives high appeal and purchase from target market/customers
- Managing existing and identify opportunities for new vendors & distributors, leading complex commercial negotiations. This includes building on new and existing partner performance methodology
- Develop commercial frameworks that cover end to end customer lifecycle and support models from vendors/suppliers. This includes reserve and forward logistics
- Lead central planning supply team on end-to-end stock management with key focus on ensuring stock availability and working capital balance. This includes all elements and KPI's associated with a planning function
- In conjunction with Trading & Proposition teams develop comprehensive GTM programme working with device suppliers to ensure successful Marketing, Channel and Customer execution covering all elements of the customer lifecycle
- Leads and develop a core team of Senior Managers and drive high employee engagement with clear succession planning.
- Team size +20

Key Achievements:

- Increased vendor funding contribution from 15% to 30% across android partners
- Secured major contract extension worth additional £4m gross profit per annum
- Drove 60% 5G device penetration reducing significant wholesale costs
- Onboarded Xiaomi, Vivo and Spacewalk to create customer and commercial differentiation
- Increased team engagement by 15 points, focusing on people, wellness, team play and personal development
