Presales engineer for enterprise B2B software. Currently owns the technical side of a Tier-1 UK mobile network operator account at Huawei, covering discovery workshops, solution feasibility validation, RFI and RFP material, testing, compliance, and pricing input alongside the sales team. Before that, spent 14 months deploying payments and e-banking products under Hong Kong's financial regulator. MSc Business Analytics, University of Exeter. Based in London, and happy with 30 percent travel.

WORK EXPERIENCE

Huawei Consumer Business Group

London, United Kingdom

Portfolio Solution Presales

Apr 2026 – Present

- Own the presales technical track on a Tier-1 UK mobile network operator account as one of a 5-person team, from customer discovery through RFI and RFP response material to the handover into sales.
- Surfaced the requirements the whole bid was built on by running 3 technical workshops and one structured requirements session with the customer's engineering stakeholders.
- De-risked what the proposal could safely promise by testing solution feasibility against roughly 6 of the account's subnet specifications before anything was committed to the customer.
- Took USD 2 of cost out of every unit by making the case in GTM roadmap and pricing discussions for dropping a feature the customer did not value.

Bank of China (Hong Kong)

Hong Kong

Technical Product Manager, E-Banking Product

Aug 2023 – Oct 2024

- Met 100 percent of the HKMA's regulatory mandates inside a hard 14-day window by turning the regulation into a technical implementation plan and coordinating internal teams and third-party vendors to ship Geo-IP fraud detection with impossible travel logic.
- Ended a 3-year-old complaint about incident triage by mining 50,000+ historical logs and building a Python anomaly detection prototype, validated with stakeholders, that told real incidents apart from deployment noise.
- Handed back over 1,000 hours a year of capacity across 50+ teams by replacing 50+ manual weekly reporting touchpoints with a single Grafana observability view.

Operation Data Analyst

Mar 2021 – Aug 2023

- Got all 6 site leaders onto that tool by demoing it to each of them personally, showing them the old report still ran underneath as a fallback, and handing over daily ownership once they were comfortable with it.
- Held operational uptime at 100 percent and NPS at 92 through the EasyPay POS migration by training 10+ Floor Champions in structured cohorts and rewriting the technical requirements into playbooks they could actually use on the floor.

B2B Solution Expert

Jan 2020 – Mar 2021

- Brought in GBP 350,000 of new B2B revenue and 7 strategic partnerships, lifting regional market penetration by 30 percent, by running the full cycle myself from market analysis and needs discovery through solution positioning to close.
- Closed a GBP 50,000 deal with a Hong Kong broadcaster over 3 months by turning a casual store visit into a real opportunity, earning trust with hands-on technical support and a custom business pricing portal, then upselling device management once they raised concerns about controlling the fleet.
- Ran the full B2B pipeline in CRM from first contact to closed won, escalating accounts to the corporate team once they matured past my coverage.

EDUCATION

University of Exeter

Exeter, United Kingdom

Master of Business Analytics

Aug. 2024 – Dec. 2025

- **Merit** (Top 10% of graduating class)
- **Relevant Coursework (Top 5% of graduating class):** AI Governance & Predictive Risk Engine. Reducing False Positives by 24% through an optimised machine learning model auditing algorithmic decision-making.

Hang Seng University Hong Kong

Hong Kong

Bachelor of Web Development

Aug. 2018 – Sep. 2022

ADDITIONAL INFORMATION

- **Languages:** English (fluent, professional), Cantonese (native), Mandarin (native)
- **Skills:** Technical selling and presales discovery · RFI/RFP response · live demos and proofs of concept · solution feasibility validation · value engineering and pricing input · Python, JavaScript, SQL, R · data analysis and visualisation (Grafana, Plotly/Dash, XGBoost, SHAP) · LLM pipelines (OpenAI API, Qdrant, n8n) · CRM, JIRA/Confluence, Figma
- **Interests:** systems design · marathon · bouldering · learning new languages
