

HUAWEI FWA Solution

E2E TCO Optimization Solution, Supporting FWA Business Success

XXX & Huawei Executive Meeting

Mar. 2026

Security Level: Huawei Confidential

Abbreviation Explanation

Abbreviation	Explanation
AAU	Active Antenna Unit
ARPU	Average Revenue Per User
CSR	Corporate Social Responsibility
DL	Down-link
FSA	Flexible Frequency Access
FWA	Fixed Wireless Access
HBB	Home Broadband
HPUE	High Power User Equipment
ICT	Information and Communications Technology
IPR	Intellectual Property Rights
MIMO	Multiple-input Multiple-output
MNO	Mobile Network Operator
NR	New Radio
QAM	Quadrature Amplitude Modulation
SUL	Supplementary Uplink
TCO	Total Cost of Ownership
UL	Up-link
X CC	X Component Carrier
MBSC	Multi-band serving cell

Business Cases

FWA Insight 1: 5G FWA Accelerates into Fast Track, Emerging as a Mainstream Home Broadband Service

Growing 5G FWA Operators Annually

248 operators running 5G FWA@2025

5G network and FWA operators trend

- **5G FWA:** Total 248 operators from 647 which announced 5G FWA, 20% CAGR Growth.

5G FWA Accelerates 4G Migration

500+ operators run 5G FWA@2030

Launched FWA services based on LTE or 5G

- **4G FWA:** The 443 global carriers with 4G FWA services suggest future growth for 5G FWA

FWA Insight 2: Delivering Faster Monetization & Better than Fiber Experience

FWA Invest on Demand, FTTx Invest on Initial

Fast Return Period of FWA, Support Operators Quick Win

5G FWA ≈ FTTH
1Gbps

5.5G FWA ≈ FTTR
10Gbps

New Technologies & More Spectrum Provide 10Gbps speed, better than Fiber experience

FWA Insight 3: FWA Evolves to Multi-Service and Experience-Based Service

Value-added Service 3: On-Device AI Agent for CPE Management

Simplifying Configuration, Diagnostics, and Daily Operations

Value-added Service 3: On-Device AI Agent for CPE Management

From Understanding Questions to Guiding The Right Actions

Scenario 1: Location recommendation

- No menu searching, no technical knowledge
- Recommends the right function
- Guided step by step

Scenario 2: Internet connectivity diagnose

- Based on real device status
- Provides clear explanation
- Actionable recommendations

Features

Always available AI assistance

Works even when internet is unavailable for:

- Basic device management
- Local diagnostics

Multi language support

English, Arabic, and more..

Available for H168, 2026H2

Value-added Service 4: Ads-push Service

Accurate Push Ads & Messages, Assisting Revenue Growth

**Pushing ads, promotions and other info accurately.
Messages notification for preventing users from missing them.**

Value-added Service 5: Dual WAN Hybrid

Delivering Higher Speed and 7/24 Online Service Capability, Facilitating The Growth of Premium Users

Dual WAN Hybrid-Backup for Enterprise

Automatic switch between wireless and wired line, 7/24h online

Dual WAN Hybrid Speed-up for Consumer

Overlay fixed and wireless bandwidth, provide higher-rate packages

HUAWEI FWA TCO Benefit 5: Supply Continuity and Delivery Capability

Leveraging Supply Continuity and Fast Delivery Capabilities to Drive User Growth and Monetization for Customers

Independent and trusted supply chain

- ☐ Produced in China, **Hub in global**
- ☐ Leading BCM system to ensure customer's **business continuity**

Flexible supply capability

- ☐ Global projects **collaboration, Flexible** delivery capability
- ☐ **>3 million units FWA capability** per month (Based on 3+3 forecast)

Logistics service level

- Main Transportation
Total 2-5days from China to Partners
- RDC to Partners
1-3days
- CDC to Partners
1-2days

HUAWEI FWA TCO Benefit 6: Easy Management, Support APP + Multi-Platform

Providing Home Network Management for Consumers and Operators, Reducing OPEX

AI life APP, all-in-one home network Management entrance

Supporting visualized management and diagnostics for home networks,
optimizing home network

- Visualized Coverage
- Location Recommendation
- Smart and visualized Diagnosis
- Parent Control

Support multiple management platform, aiding operators in improving user experience and reduce OPEX

Support TR069/TR369, support LTM/NCE and 3rd party platforms

- Remote Service Provisions
- Whole Network CPE Insight
- Remote Fault Locating
- Performance Management

Management Service 1: AI Life APP for End User

Improving User Experience and Reducing OPEX

Signal Coverage

Provides a coverage map of your home Wi-Fi, displaying coverage precisely and vividly.

Smart Diagnosis

View the network status for each of the connected devices in your home. Get a clear understanding of your home network status.

Optimize Your Network

Detects connection issues and gives professional advice to optimize your home network.

Find Optimal location

Find the better CPE location for better speed and lower the customer complain

Use the AI Life app to generate a heatmap with one click and view the network coverage in real-time. Also supports network fault detection and diagnosis in more than 80 scenarios.

Management Service 1: AI Life APP SDK for Carrier

App SDK Enables Carriers to Quickly Integrate CPE Management Capabilities and Improve User Loyalty

Easy Carrier APP Integration

Huawei Provide

Operator Provide

Carrier App

Customized UI

CPE APP SDK

Operator APP Entry

Carrier APP Demo

One-Time Development, Multi-Platform Deployment

- Supporting both Android and iOS
- Reduced development and maintenance costs.

Fast integration, smooth rollout

- No disruption to existing app architecture
- Supports phased feature enablement

SDK capabilities

- Device status
- Device basic management
- CPE location optimal

Management Service 2: Operation & Maintenance for Operators

Support Multiple Remote Network Management Platform for Operators, Reducing OPEX

End to End Management Solution

Remote Service Provisioning

- Initial Service Provisioning
- Composed Service Provisioning
- Remote Upgrade

Whole Network CPE Insight

- Quantity by Different Category (Total/Active/Working Band et.)
- Abnormal CPE
- Signal/ Frequent Reboot

Remote Fault Locating

- Connectivity
- Signal Coverage
- Wi-Fi User Signal Quality

Performance Management

- KPI Periodic Collection
- Near Real-Time Monitoring
- KPI Customized Visualization

Business Cases

Early-Stage Market: Carrier O Tunisia Developed 5G FWA Quickly via HUAWEI High-Performance Devices & Game Acceleration to Outperform Competitors and Expand Market Share

Market Analysis

2025 is the first year for Tunisia to launch 5G FWA services. Carrier O aims to regain 2nd place in the market with 5G FWA service launch.

Carrier O's 5G Spectrum

Pain Points

- High market homogeneity → require value-added services to compete with others
- Severe market competition → require 2C support, retail, MKT, etc. to increase SO

Huawei Solutions

01

Optimal Product Proposal

Launch 2CC products which are optimized for O's network spectrum resources

02

APP Acceleration Feature

Game turbo, video turbo as special value added service

03

Joint Marketing Campaign

Leverage trending events with special editions to enhance SO

Africa Cup
MKT Campaign

Business Achievements

5G FWA User Rapid Growth

SO Increase driven by MKT campaign

Emerging Market: With HUAWEI High Quality & Performance Products Carrier U Malaysia Effectively Reduced Service Costs and Improved Customer Satisfaction

Market Analysis

Carrier U’s fixed network & 4G FWA growth restricted: No proprietary fixed network, inadequate 4G sites with poor coverage and experience.

Market Share	No.1	No.2	No.3
FTTx			
4G FWA			

So in the 5G era carrier U pivots strategic focus to 5G FWA expansion.

5G FWA Pain Points after Launch

- 1. High return rate, high after-sales costs.
- 2. Poor signal, poor network experience, mass customer complaints.

Huawei Solutions

01

Excellent Quality

Help carrier sharply drop FFR and save costs.

02

Ultra Performance

03

2C Capabilities Support

Display, MKT, sales support improve SO and accelerate number allocation.

04

Value-added Features to Increase User ARPU

APP turbo, eSIM, AI Life, CMF customization etc.

Business Achievements

5G FWA User Rapid Growth

5.5G Migration: Carrier Z Kuwait Launched Multi-Tier 5.5G Tariff Packages with HUAWEI Solutions to Drive High-Value User Migration and ARPU Growth

The First Carrier in the Gulf Region Launching 5.5G CPE

01 Launch tiered 5.5G tariff packages with Huawei extensive product portfolio

02 Joint Marketing to promote 5.5G services

CPE Ultra 6 Dedicated 5.5G Package, targeting premium users

03 Huawei Smartcare platform enables operators to develop users accurately

Site No.XXX target user			
User	priority	Device model	Pain point
A	S	CPE Pro 2	Speed
B	A	CPE Pro 2	Package vol.
C	A	CPE Pro 3	Coverage
.....			

Pre-expiry contract users identification, pain point analysis & 5.5G conversion proposal customization

Business Achievements

5.5G FWA Users Rapid Growth

FWA market share No.1 with high ARPU

Operator	FWA Users Share	FWA Value Share
	35%	54%
Operator 1	33%	28%
Operator 2	32%	18%

Fixed-Mobile Convergence Solution: UAE Top 1 Carrier E Captures Home Broadband Market Share with Huawei High-Performance Devices and Dual-WAN Features

Market Analysis

As **top 1 operator** in the UAE, carrier E dominated the home network market with 84% market share in 2021.

Market Challenges Emerge

From 2022, E's home market share dropped sharply, challenged by Carrier D which launched the "5G FWA No.1" campaign. Lacking of attractive 5G FWA service, E suffered severe user loss.

Huawei Proposal

- 01 Launch 5G FWA products**
Support E to launch high-performance 5G FWA products quickly to win back users.
- 02 Hybrid solution**
Synergetic development of FWA and fiber. Deploy 5G FWA in areas not covered by fibers as a complement solution, and convert the CPE into a router to expand the home coverage after fiber deployment.

- Step 1: 5G CPE**
Seize the market first
- Step 2: Fiber + 5G CPE**
Better experience
 - Speed up
 - Fixed-line back-up
 - Wider home coverage

Greater Business Success

With Huawei 5G FWA solutions, Carrier E pivot to FWA business, fast-tracked user acquisition and broke the historical peak in market share.

Carrier O Germany Gains Larger Market Share by Expanding MVNO Channels with Huawei Solutions

Business Background

Carrier O owns many sales sub-channels, a number of MVNO channels are important business drivers for O's mobile services.

For exploring more FWA sales opportunities and developing more users, O expanded the cooperation with Huawei in different channels.

■ Huawei products launched

Cooperation with Huawei

01

Bring Huawei into More Channels
