Portfolio Solution Presales

Apr 2026 – Present

- Own the evaluation and demo unit programme on a Tier-1 UK mobile network operator account, tracking 60 to 80 live evaluation units against launch deadlines and holding sign-off so product reaches the customer's evaluation teams ahead of their decision points.
- Kept the proposal to what the network could actually carry by validating solution feasibility across 6 of the account's subnets, as the dedicated presales cover inside a 5-person pursuit team.
- Produced the documented solution scope the pursuit was built on, working the full requirements cycle across 3 technical workshops and one structured analysis session.

- Handed back 8 hours a week of manual reporting across 20 systems, roughly 400 hours a year, by deploying a centralised Grafana observability framework in place of hand-assembled weekly reports.

- Closed a GBP 50,000 deal with Hong Kong broadcaster Viu TV over 3 months by turning a walk-in store visit into a qualified opportunity, earning trust with hands-on technical support and a custom business pricing portal, then clearing their device management objection by upselling MDM.
- Onboarded 12 portfolio accounts onto custom stores, setting each one up with post-sales service coverage so the account stayed served after the sale.
- Generated GBP 350,000 in new B2B pipeline across a 50+ account portfolio by running discovery, solution positioning and qualification end to end, then escalating matured accounts to the corporate team to close.
